01

Know Your Product Well. By knowing your products well you can start recycling more things

02

03

Lightweight materials use less energy in its production, making them more environmentally friendly. Also, they require less fuel for transportation, thereby reducing costs for business decision-makers as well as consumers. Due to technological developments and commercial feasibility improvements, they are at least as strong as heavier materials. Another advantage is that, regarding the products people carry, lighter weights can reduce fatigue.

04

Minimize Everything.

05

Organize the Box Efficiently.
