LTT Activities C-2

COMMENTS ON THE RESULTS OF THE SURVEY ABOUT CREATIVE THINKERS

According to the results of the survey we can state that the majority of students are always willing to try new activities whereas they usually use their imagination when playing by making up stories. They like to put original ideas into their work but they don't really do it at least not so often as they want.

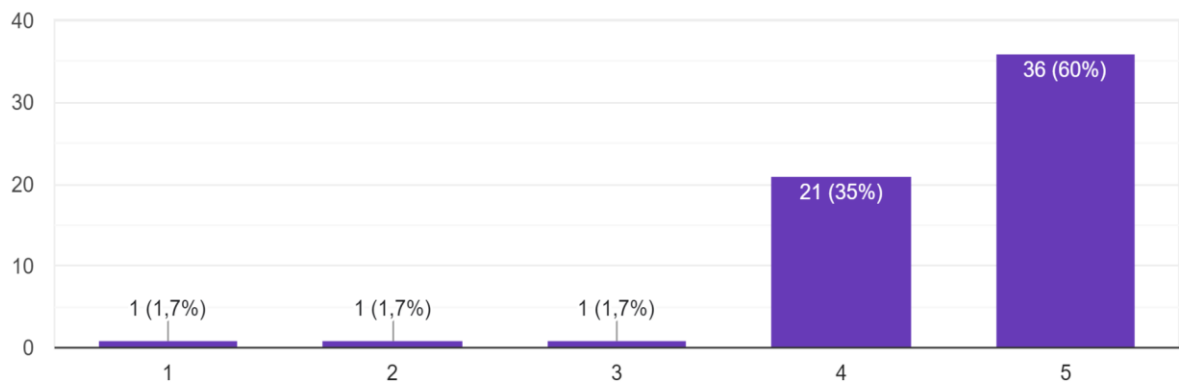

Most of them always try alternative approaches but they are a bit more hesitant to make connections through play and experimentation. They are curious by asking questions and a high percentage of them use failure as a way of learning! They usually try to think "outside the box" and in a different way to find new solutions and reach a higher level of understanding in their learning!

Taking all the above into account we conclude that students really want to think in a more creative way to find solutions and make decisions about specific issues but they are a bit reluctant to apply it in practice!

Below you can have a look at the results of the survey

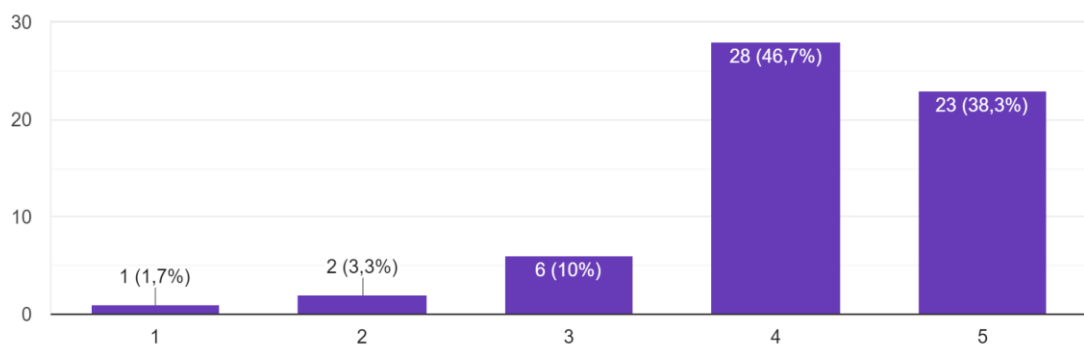

I am willing to try new activities

60 απαντήσεις

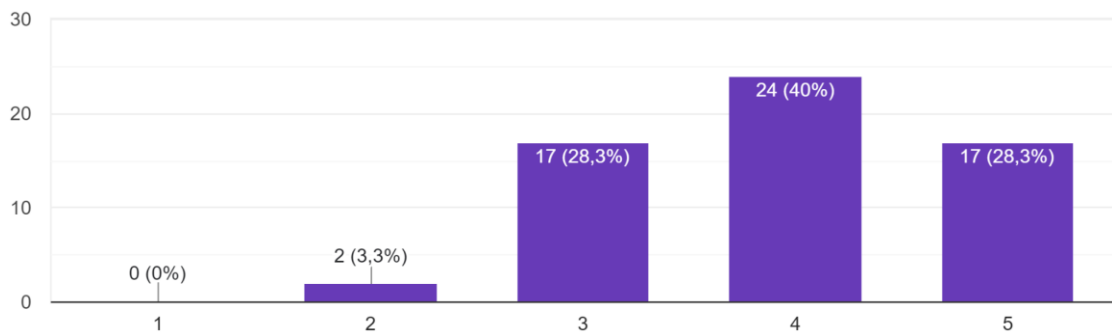

I use my imagination when playing (e. g. making up stories or events)

60 απαντήσεις

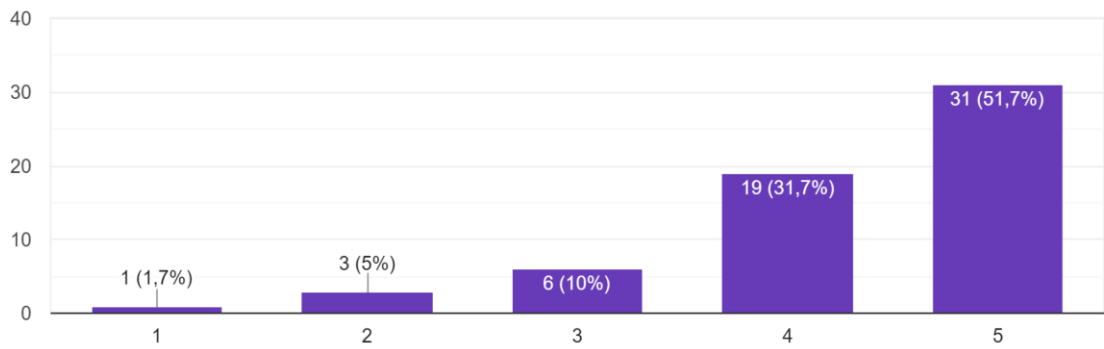

I put forward ideas even if they are not the same as others

60 απαντήσεις

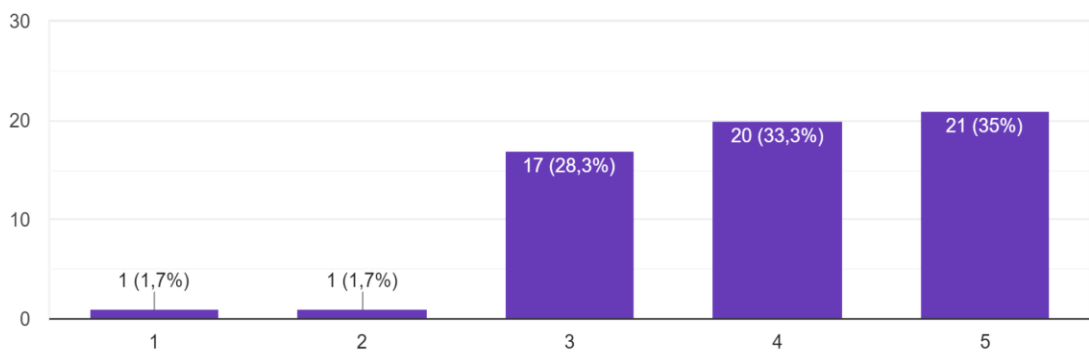

I like to put original and unique ideas into my work

60 απαντήσεις

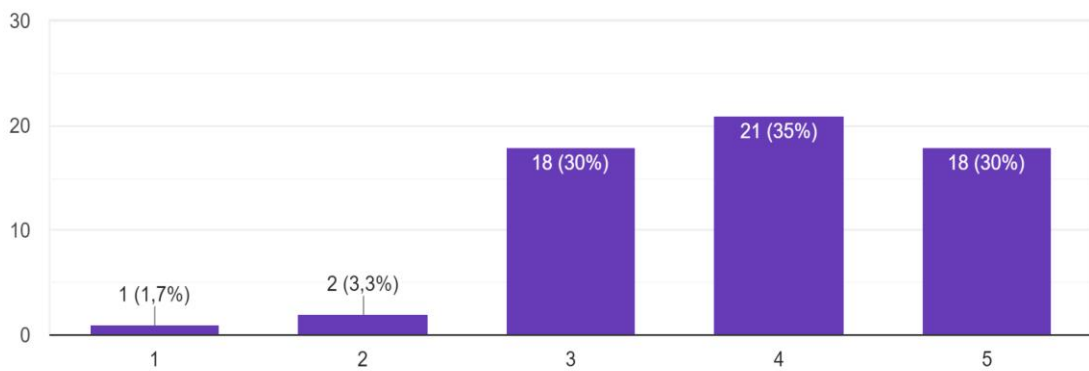

I try alternative and different approaches

60 απαντήσεις

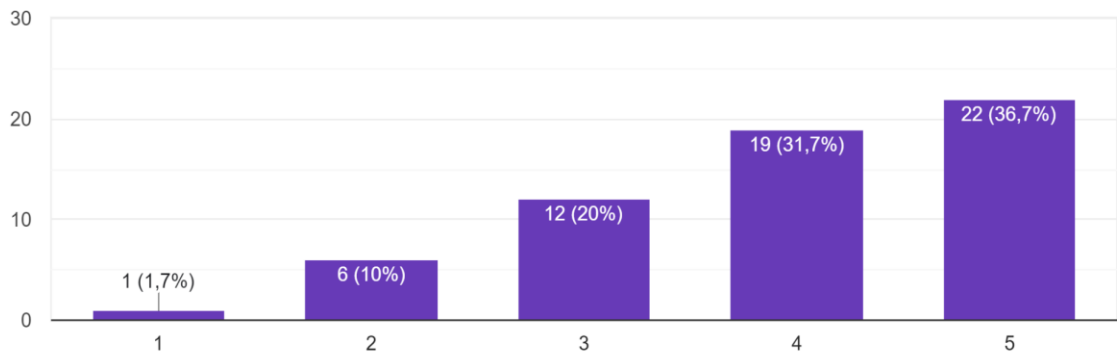

I discover and make connections through play and experimentation

60 απαντήσεις

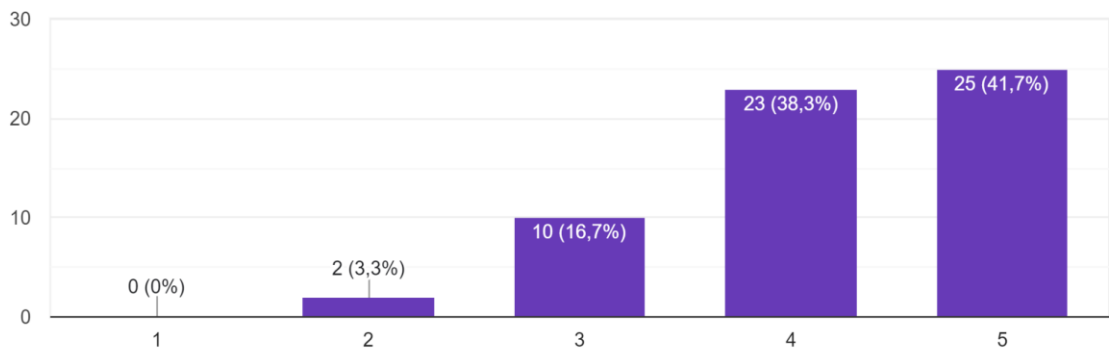

I ask "why", "how", "what if" and unusual questions

60 απαντήσεις

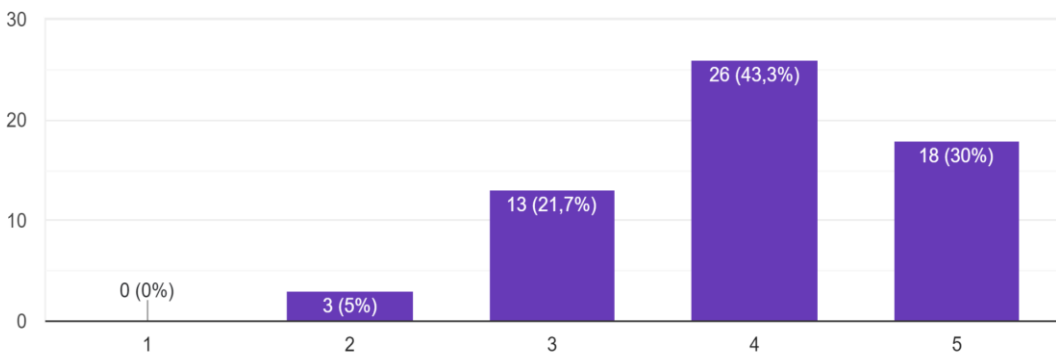

I use failure as a way of learning what to do differently next time

60 απαντήσεις

I use my previous learning to create new solutions by "thinking outside the box"

60 απαντήσεις

I regularly try to think differently from others in order to reach a higher level of understanding in my learning
