What is creative thinking?

Why is creative thinking important?

How can we encourage creative thinking?

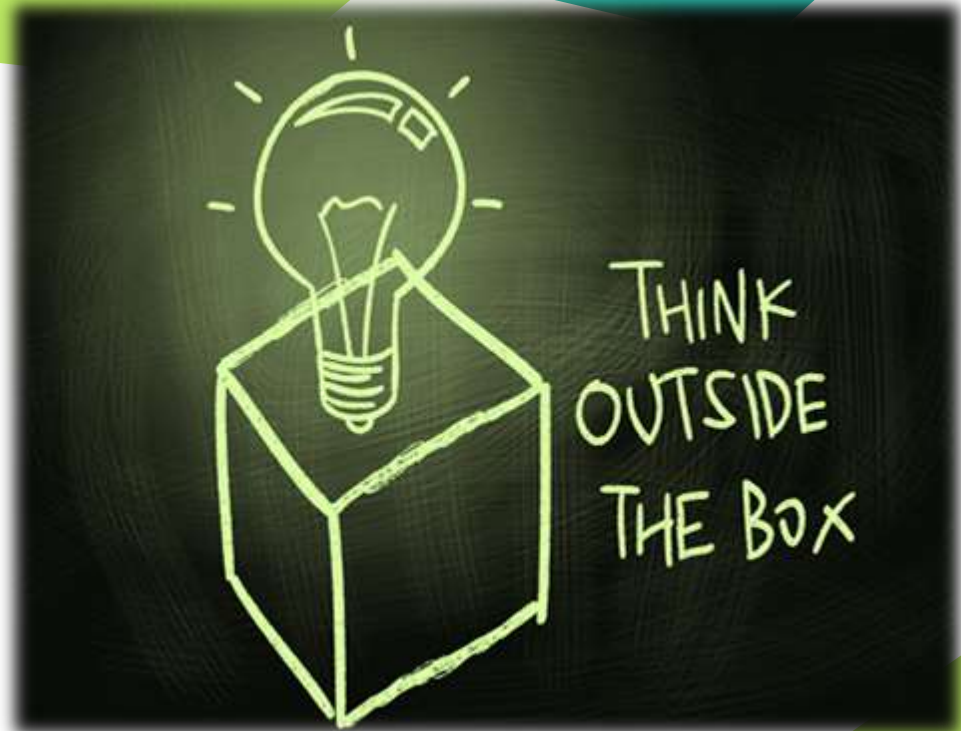

What are the qualities of a creative thinker?

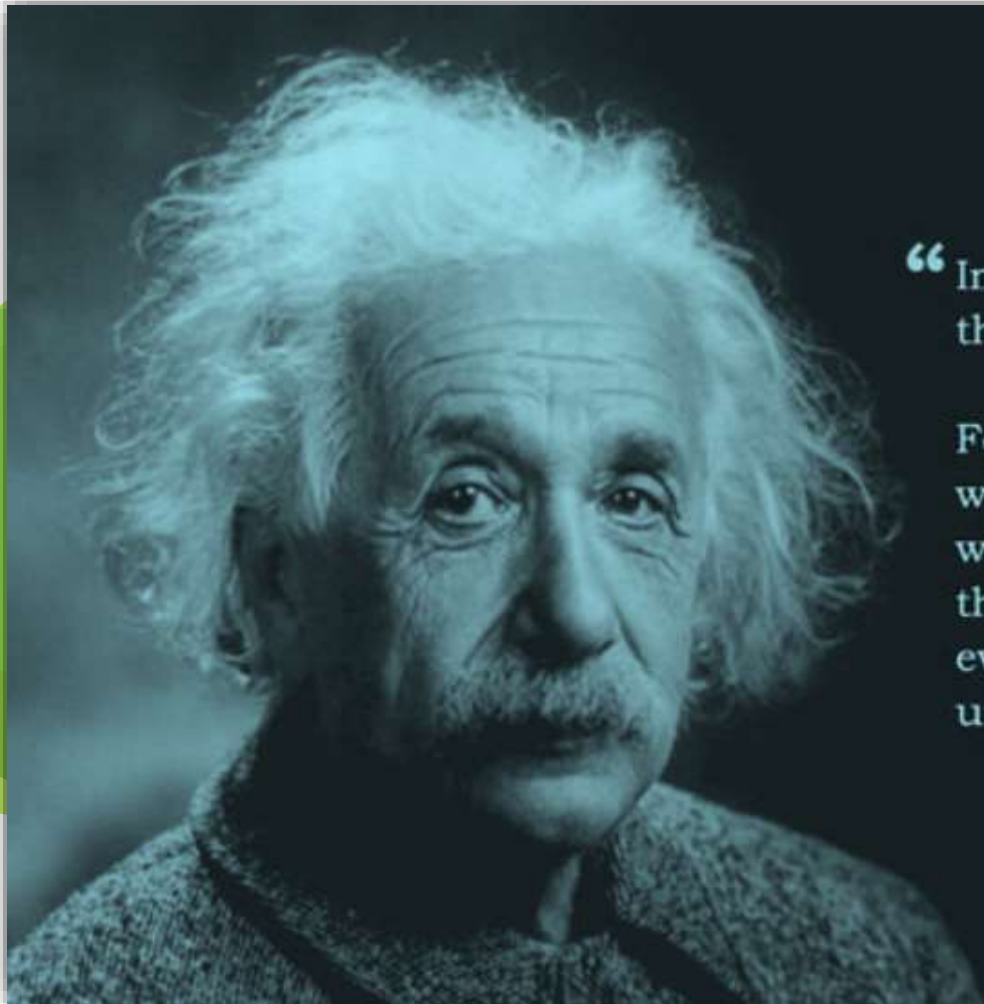

What are the types of creative thinkers?

What is creative thinking?

Creative thinking is the process of nurturing your imagination allowing you to **think out of the box**.

It comes from **thinking differently, looking at** life from new perspective, **imagining** new results, **challenging** norms and **asking** questions...

“Imagination is more important than knowledge.

For knowledge is limited to all we now know and understand, while imagination embraces the entire world and all there ever will be to know and understand.”

- Albert Einstein

Can **creativity** be learned or is it an innate quality of an individual?

Creativity is a skill that can be learned!!

It is a **skill** like all other skills and as such it is something that we can **practice** and **learn!!**

It is largely a product of **hard work!!**

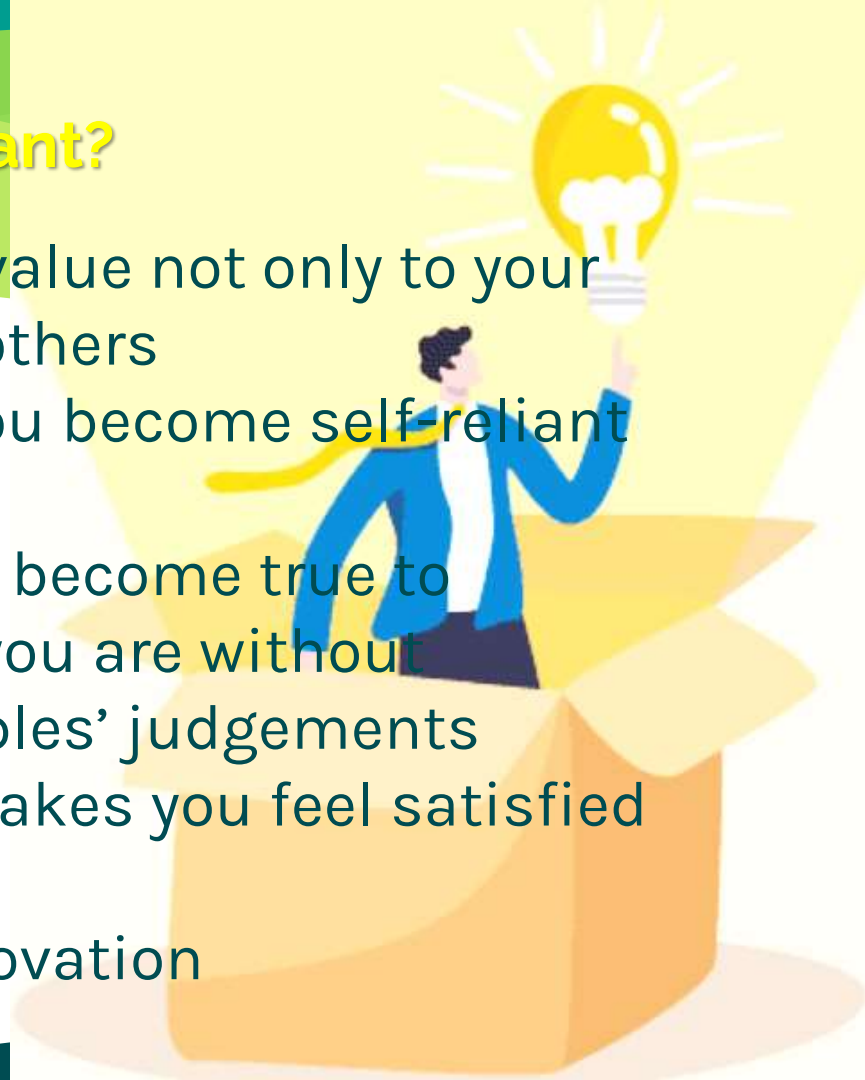

It took Mozart 10 years of composing music before he produced what is considered his first masterpiece!!!

Why is creative thinking important?

- ◆ Thinking creatively adds value not only to your life but also to the life of others
- ◆ Creative thinking helps you become self-reliant and more confident
- ◆ By thinking creatively you become true to yourself, you accept who you are without worrying about other peoples' judgements
- ◆ Thinking out of the box makes you feel satisfied at all phases of your life
- ◆ It is a prerequisite for innovation

The qualities of a creative thinker

Creative thinkers are always curious

They have a willingness to change

They are willing to admit when they are wrong

And the list goes on..

They
can say
"I don't
know"

They
are
intensely
goal
focused

They
have less
ego
involvement

The 5 types of creative thinkers

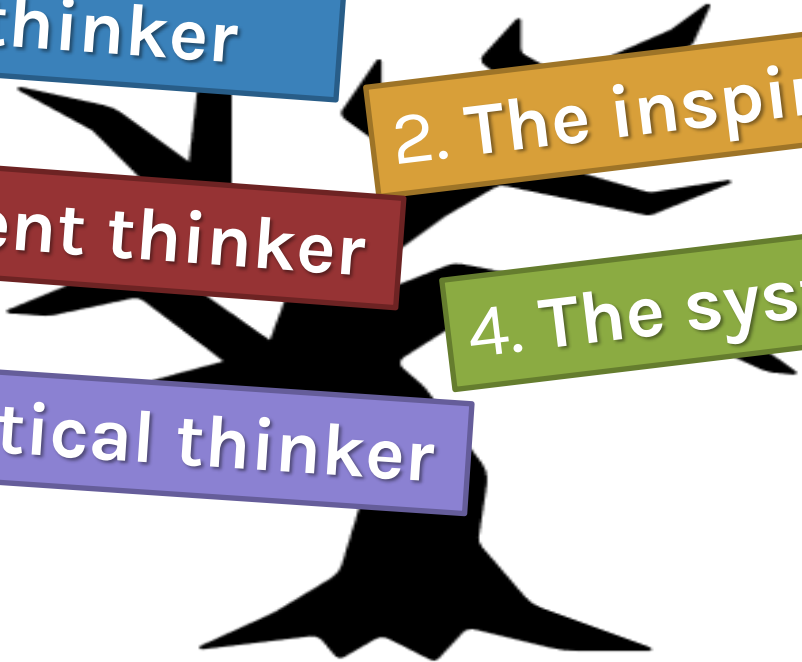

1. The lateral thinker

2. The inspirational thinker

3. The divergent thinker

4. The systematic thinker

5. The aesthetical thinker

1. The Lateral Thinker

The lateral thinker

They think **outside the box** generating new ideas instead of working with what's already familiar! Lateral thinking is great for **problem-solving, innovations & inventions!**

2. The Inspirational Thinker

higher
creativity

The inspirational thinker

Inspirational thinking is usually
spontaneous, quick and comes out
of nowhere!!!

convergent
thinking

divergent
thinking

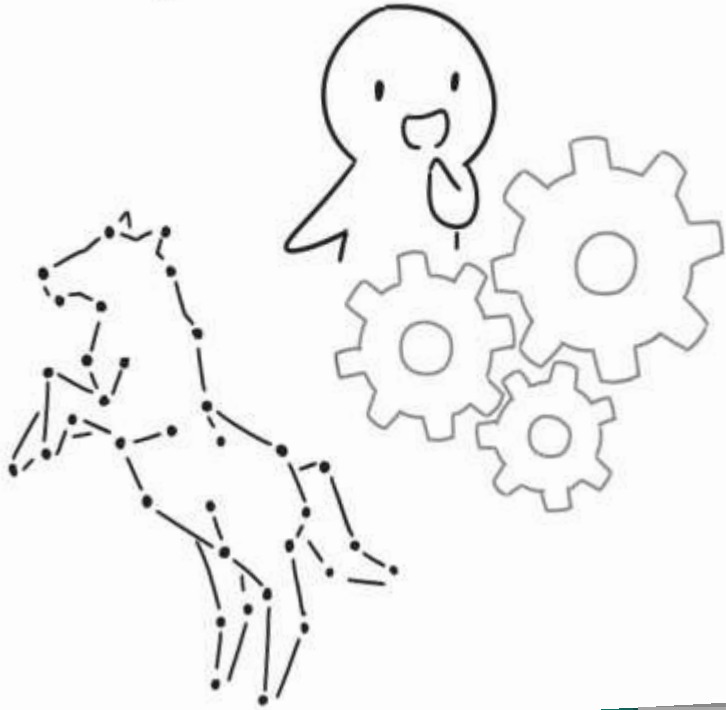

3. The divergent thinker

Divergent thinking involves a more flexible approach where many solutions and options are explored.

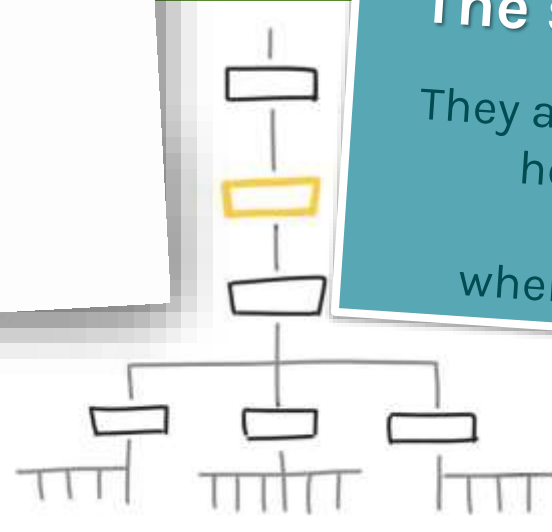

It is the opposite of convergent thinking which concentrates on only one idea or a single solution!

4. The Systematic Thinker

The systematic thinker

They are good at understanding how things are related to one another when they look at systems!

5. The Aesthetical Thinker

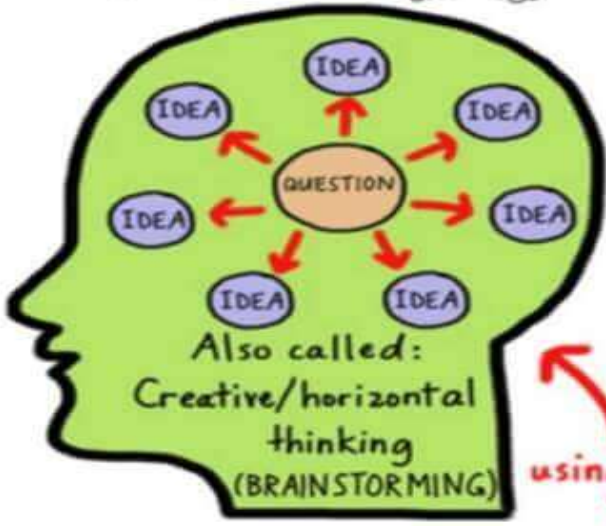

The aesthetical thinker

Aesthetical thinking involves producing or creating things that are pleasing to our senses! Architects, painters, musicians, writers, scientists and mathematicians all belong under this creative branch!

A PIECE OF

*The most important part of creative thinking
is your ability to generate ideas!!*

*Every single time you originate a new idea,
write it down,
make a plan for its implementation
and then take action!!*

*The more you manage your creativity in this
way,
the smarter you will become
and you will achieve in every area of your life*

YOUR FUTURE WILL BECOME UNLIMITED!!!
